RE: FEMA PDM-PJ-09-CA-2010-019, North Tahoe hazardous Fuel Reduction

Dear Donna M. Meyer

Thank you for your letter dated for December 13, 2012 seeking information regarding the proposed FEMA, North Tahoe Hazardous Fuel Reduction Project. Based on the information provided, the Shingle Springs Band of Miwok Indians not aware of any known cultural resources on this site. However, SSR would like to have continued consultation through updates, as the project progresses this will foster a greater communication between the Tribe and your agency.

SSR would also like to request any and all completed record searches and or surveys that were done in or around the project area up to and including environmental, archaeological and cultural reports.

If during the progress of the project new information or human remains are found we would like to be able to go over our process with you that we currently have in place to protect such important and sacred artifacts (especially near rivers and streams).

Please contact the following individuals if such finds are made:

Andrew Godsey, Assistant Cultural Resource Director / NAI
Office: (530) 698-1403 agodsey@ssband.org

And copy all communications to:
Angela Rivera, Administrative Assistant anrivera@ssband.org Office: (530) 698-1557

The Shingle Springs Band of Miwok Indians would like to apologize to you for the delayed response, and also thank you for providing us with this notice and opportunity to comment.

Sincerely,

Daniel Fonseca
Cultural Resource Director
Tribal Historic Preservation Officer (THPO)
Most Likely Descendent (MLD)

RE: FEMA PDM-PJ-09-CA-2010-019
North Tahoe Hazardous Fuel Reduction

Dear Mr. Fonseca:

Section 101(d)(6)(B) of the National Historic Preservation Act of 1966 as amended requires the Department of Homeland Security – Federal Emergency Management Agency (FEMA) to consult with any Indian Tribe that may attach religious and cultural significance to historic properties that may be affected by a FEMA Undertaking. FEMA is considering a Pre-Disaster Mitigation (PDM) grant to the North Tahoe Fire Protection District (Subapplicant) to reduce the loss of lives and property from catastrophic wildfire. The proposed project would reduce hazardous vegetation adjacent to 1,013 properties within the defensible space zone surrounding each home on publicly-owned property across 238 acres of untreated forest.

FEMA has identified an Area of Potential Effect (APE) as the proposed project area along the north and west shores of Lake Tahoe, El Dorado and Placer Counties. The area has been divided into three regions: the north shore containing 395 parcels, the northwest shore containing 363 parcels, and the western shore with 238 parcels. The proposed project would include portions of Kings Beach, Tahoe City, and Homewood.

Because potential direct and indirect impacts of the Subapplicant's proposal may have an effect on historic properties we respectfully request your interest regarding the proposal; any comments regarding identification of the Area of Potential Effect (APE); historic properties; advise us on the identification, evaluation, eligibility of any historic properties including those of traditional religious and cultural importance; articulate your views of the

Subapplicant's proposal and FEMA's subsequent Undertaking of providing grant assistance on such historic properties; and, to participate in the resolution of any adverse effects.

We will condition the grant so that if any historic properties are encountered during construction all work would cease and the Subapplicant would be required to contact FEMA, the Tribe, and the State Historic Preservation Officer. If you have any questions or require additional information please do not hesitate to contact me at (510) 627-7728, the letterhead address above or donna.meyer@fema.dhs.gov.

Sincerely,

Donna M. Meyer, CEM/HPS
