

Dear Board Members,

A lawsuit has now been filed against the project's principals that asserts: misrepresentation of its true scope and size, arrogantly dismissing residents' concerns, and minimizing major public safety problems in the Environmental Impact Report (EIR); conflicts of interest; and multiple failures to act in good faith. The subject project has seriously damaged credibility within our community, and "rubber-stamping" its approval would only spread that damage further.

Regards,

Janet & Roger Huff
