**ATTACHMENT 2**

California Tahoe Conservancy
Resolution
26-06-04
Adopted: June 18, 2026

## DENNIS T. MACHIDA MEMORIAL GREENWAY – VAN SICKLE CONNECTOR

The staff recommends that the California Tahoe Conservancy (Conservancy) adopt the following resolution based on the accompanying staff report, and pursuant to Public Resources Code section 21000 et seq.:

> "The Conservancy, in its capacity as lead agency under the California Environmental Quality Act (CEQA), prepared an Addendum to the South Tahoe Greenway Shared-Use Trail Project Initial Study/Mitigated Negative Declaration (IS/MND) to evaluate minor technical changes made for the Dennis T. Machida Memorial Greenway – Van Sickle Connector (Greenway Connector). The Conservancy finds that none of the conditions under CEQA Guidelines section 15162 requiring the preparation of a subsequent MND have occurred because:
>
> (a) The modifications do not constitute a substantial change that would require major revisions to the MND due to the involvement of new significant environmental effects or a substantial increase in the severity of previously identified significant effects;
>
> (b) The modifications do not constitute a substantial change with respect to the circumstances under which the Project is undertaken which will require major revisions to the MND due to the involvement of new significant environmental effects or a substantial increase in the severity of the previously identified significant effects; and
>
> (c) There is no new information of substantial importance, which was not known and could not have been known with the exercise of reasonable diligence at the time the MND was adopted, showing any of the following: (i) the Greenway Connector would have one or more significant effects not discussed in the MND; (ii) significant effects previously examined would be substantially more severe than shown in the MND; (iii) mitigation measures or alternatives previously found not to be feasible would in fact be feasible and would substantially reduce one or more significant effects, but the project proponent declined to adopt such measures; or (iv) mitigation measures or alternatives considerably

different from those analyzed in the MND that would substantially reduce one or more significant effects on the environment, but which the project proponent declined to adopt.

The Conservancy has considered the Addendum in connection with the previously approved IS/MND, and hereby finds on the basis of the whole record before it that there is no substantial evidence that the Greenway Connector, as mitigated, will have a significant effect on the environment. The Conservancy further finds that the Addendum fully discloses and analyzes the environmental effects of the Greenway Connector and reflects the Conservancy's independent judgment and analysis.

The Conservancy adopts the Mitigation Monitoring and Reporting Program (Exhibit A), which incorporates mitigation measures and ensures that required mitigation is implemented for the Greenway Connector.

The Conservancy directs the staff to file a Notice of Determination for the Greenway Connector with the State Clearinghouse."

The staff also recommends that the Conservancy adopt the following resolution pursuant to Government Code sections 66906.8, 66907, 66907.9, 66907.10, and 66908:

"The Conservancy hereby approves the Greenway Connector, including authorizing the staff to accept and expend up to a combined $10 million to implement the project together with the Van Sickle Bi-State Park Safety and Equitable Access Improvements Project, and to enter into agreements and take all other necessary steps consistent with the accompanying staff recommendation to implement the Greenway Connector."

I hereby certify that the foregoing is a true and correct copy of the resolution duly and regularly adopted by the Conservancy at a meeting thereof held on the 18th day of June, 2026.

In WITNESS THEREOF, I have hereunto set my hand this 18th day of June, 2026.

_____

Jason Vasques
Executive Director
